Filament to have ready (reprint set)

PLA Light Grey	301 g	(buy with 20 % margin: 361 g)
PETG Orange	156 g	(buy with 20 % margin: 187 g)

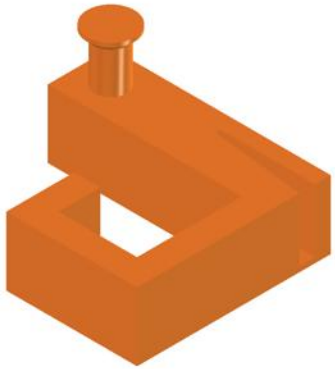

Keep from the first print

fit_coupon_x1: use your printed fit_coupon_x1
wheel_x6: use your printed wheel_x6
wedge_x1: use your printed wedge_x2 (you have 2, need 1)
lead_rail_230_x3: use your printed lead_rail_230_x3
chain_11_links_x3: use your printed chain_11_links_x3
gate_key_x1: use your printed gate_key_x4 (you have 4, need 1)
gate_pin_x1: use your printed gate_pin_x3 (you have 3, need 1)

Print order

1. Three each of comb, chain bed, sled and bumper; the sleds and bumpers can share plates with the small parts.
2. Window hook (PETG), start gate and lever.
3. Then rig the wire: hook at the window, handover on the floor, gate 0.3 m below the hook.

Reprint parts 1 to 3 of 7

PRINT Wire end

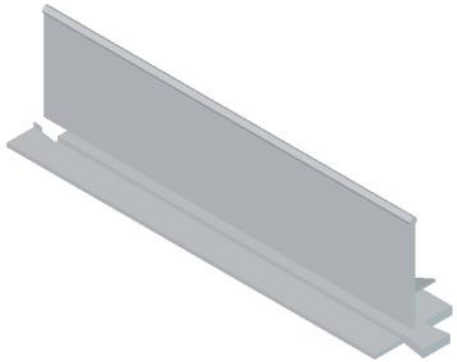

window_hook_x1

PETG Orange

qty 1 · 49.6 g · 1h 25m · 84.0 × 74.0 × 46.0 mm on the bed · 0.20 mm layers

top anchor: capstan post and wedge pocket

Why reprint: pocket opens upward; rim prints without support

PRINT Bays

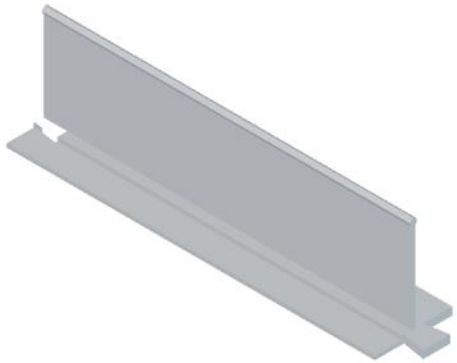

brake_comb_190_x3

PLA Light Grey

qty 3 · 150.5 g · 3h 27m · 202.0 × 40.0 × 53.5 mm on the bed · 0.20 mm layers

rail with 12 leaves under the right basket and the chain trough under the left

Why reprint: v1 leaves stood 21.7 mm tall and would ram the baskets; v2 leaves reach 13.8 mm and end inside the segment

PRINT Bays

chain_bed_190_x3

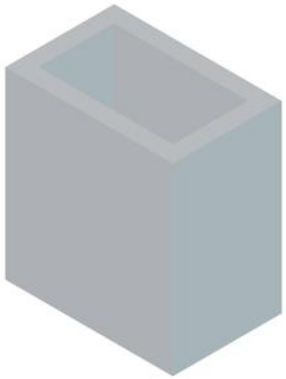

PLA Light Grey

qty 3 · 132.9 g · 2h 34m · 202.0 × 40.0 × 53.5 mm on the bed · 0.20 mm layers

rail with the chain trough, end to end; the sled starts here

Why reprint: trough runs to the end so the sled can reach the bumper; no stirrup ring

Reprint parts 4 to 6 of 7

PRINT Bays

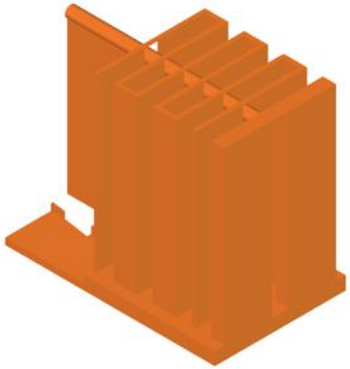

sled_x3

PLA Light Grey

qty 3 · 10.0 g · 0h 23m · 20.0 × 13.0 × 22.0 mm on the bed · 0.20 mm layers

pushed by the left basket; drags the chain tied to its back

Why reprint: new: the left basket pushes it and the chain

PRINT Bays

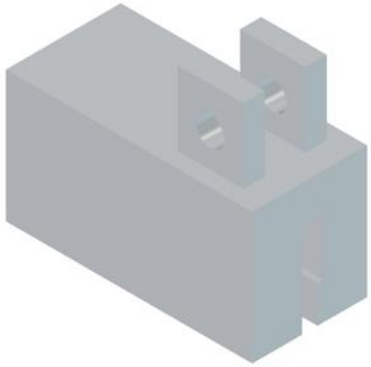

bumper_x3

PETG Orange

qty 3 · 106.2 g · 4h 45m · 64.0 × 40.0 × 56.0 mm on the bed · 0.12 mm layers

zig-zag spring at the end of each bay

Why reprint: rail stub runs to the face plate; trough for the sled

PRINT Start gate

start_gate_x1

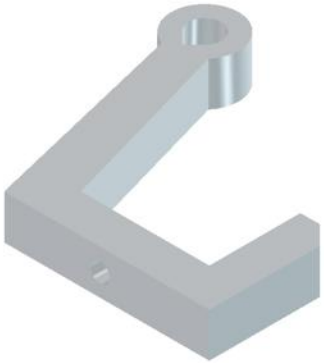

PLA Light Grey

qty 1 · 5.8 g · 0h 19m · 30.0 × 14.0 × 25.0 mm on the bed · 0.20 mm layers

clamps on the wire behind the waiting wagon

Why reprint: v1 wire slot was 1 mm for a 1.5 mm wire and the key missed the wire; the slot now opens downward so the gate hangs on the wire

Reprint parts 7 to 7 of 7

PRINT Start gate

gate_lever_x1

PLA Light Grey

qty 1 · 1.4 g · 0h 09m · 28.9 × 28.5 × 4.6 mm on the bed · 0.20 mm layers

hook over the wagon's rear spacer peg

Why reprint: new hook over the rear spacer peg
